

IN THE SPECIFICATION

A subsequent specification is enclosed herewith having the following amendments to the specification:

- Page 2, Lines 2 and 3, under the heading "Related Application", the serial number and filing date for the related application has been amended to read "U.S. Patent Application Serial No. 10/689,913, filed October 21, 2003, entitled *Thread Protector for Use on Pin End of Oilfield Tubulars*";
- FIG. 13 has been changed to FIG. 13A, and FIG. 13A has been changed to FIG. 13B;
- FIG. 14 has been changed to FIG. 14A, and FIG. 14A has been changed to FIG. 14B;
- FIG. 15 has been changed to FIG. 15A, and FIG. 15A has been changed to FIG. 15B;
- FIG. 16 has been changed to FIG. 16A, and FIG. 16A has been changed to FIG. 16B;
- FIG. 17 has been changed to FIG. 17A, and FIG. 17A has been changed to FIG. 17B;
- FIG. 18 has been changed to FIG. 18A, and FIG. 18A has been changed to FIG. 18B.
- FIG. 19 has been changed to FIG. 19A, and FIG. 19A has been changed to FIG. 19B.
- FIG.'s 22(a) - 22(f) has been changed to 22A - 22F.

None of these changes from FIG.'s 13-19 to FIG.'s 13A-19A, and from FIG.'s 13A - 19A to FIG.'s 13B - 19B, has any bearing upon the merits of the application or teachings therein. This was merely an oversight when the application was prepared.

A new printout of the Claims and Abstract are enclosed with the substitute specification but are unchanged from those as originally filed.

This Amendment also includes a signed Declaration and Power of Attorney from each of the five named inventors.

This Amendment also includes the submission of formal drawings to replace the informal drawings originally filed.
